CODING LANGUAGES / HARD SKILLS

Coding Languages

- C#
- C++
- HTML/CSS
- Java
- JavaScript
- .NET
- Python
- SQL

Hard Skills

- Web Development
- Data Structures
- Security
- Debugging
- Object Oriented Programming
- Advanced Math

EDUCATION

SOFTWARE ENGINEERING (AAT)

School: Clover Park Technical College

Dates From Spring 2017 – To Winter 2018

- Deans List
- Presidents List
- Created many websites applications using Object Oriented Programming model using coding languages such as C#, JavaScript, and Java to name a few.
- Experience in Source Control using GitHub.
- Proficient in working on teams as well as individually in order to reach deadlines to finish complex web applications.

WEB DEVELOPER WORK HISTORY

FREELANCE WEB DEVELOPER
Dates From Spring 2017- Current

Projects

- Designed a checklist application for a corner store that keeps track of the inventory.
- Developed an Ecommerce Website where users can login/logout and buy and sell different products.
- Developed a different version of the game "Meteor" using Phaser on Visual Studio Code.
- Developed a website where users could log in and blog, or leave comments on other users blog posts.
- Developed a To Do List application using Android Studio which lets users create tasks as well as reminders and alarms.

9TAPTOUR
Dates From Summer 2018 to Winter 2018

Tasks

- Led a small team of developers whose development tasks ranged from issues such as debugging, testing, writing Scripts, and most of all matching each task to fit the strength of each individual on the team.
- cleaned up messy code, or redundant code and organized the files so it was easier as a team to work efficiently.
- Built the structure to format data between Microsoft Excel and the application we were developing.
- Developed a more efficient sorting method to handle the bowler player placement on the tournament rack as well as keep track of their scores each game.

IDE

- Visual Studio 2017
- Visual Studio Code
- Atom
- jGrasp
- Android Studio
- SQL Management Studio

SOFT SKILLS

- Communication
- Problem-Solving
- Team Work
- Research
- Creative

ACTIVITIES

Club OOPS

- School object oriented programming club where students would meet to get tutored or to develop applications not related to school in teams.

Hackathon

- Once or twice a month a group of us meet to do a mini Hackathon, where we come up with different application ideas and try to develop it.

White Boarding

- A group of us meet up once a week to practice white boarding together.

Study Night

- About three to four times a week my friends and I meet up at a local café to study, code and keep up to date with the newest technologies.

JOB EXPERIENCES

Assistant Manager/Cashier/Ez-Mart (April 2017 – Current)

- Handling day-day operations alone with limited assistance from owner
- Interacting and engaging with a wide customer base
- Processing cash, credit, and EBT sales
- Managing inventory such as soft drinks, food, alcoholic beverages and tobacco products
- Experience with resolving difficult situations involving customers

Car Salesman/AutoNation Honda of Renton (January 2016 – April 2017)

- Utilizing central database to contact potential customers and inquire about their needs.
- Anticipating customer requirements to present the right product to the customers that fit his/her needs.
- Giving customized presentations to visiting customers, adapting to their different needs and requirements.
- Striving to come up with creative solutions to resolve day to day issues and to complete challenging sales.
- Learning to gauge customer interest and initiating dialogue.
- Following up with past clients to see if they are still happy with their purchase, and if not resolving any needs that have not been met.
- Received a number of very positive customer reviews and references.

VOLUNTEER/LEADERSHIP

Worship/Band Leader (2006-Current)

- Delegating specific tasks and responsibilities to each member.
- Helping to draw out the potential from team members into the form of skills and talents.
- Preparing for service each week with practices, song selections, and team discussions.
- Serving as the representative for the team when working with senior church staff

Discipleship Training School (October 2014-April 2015)

- Spent three months training in gospel outreach to share in various villages in India.
- Was assigned to volunteer tasks and responsibilities on the training campus such as serving food for over 300 people.
- While in India shared biblical scripture and testimony in front of anywhere to 10 to 400 people.
